

Table 6.8 Test of Parallel Lines From MJ and zACH Analysis

Test of Parallel Lines ^a				
Model	-2LL	Chi-Square	<i>df</i>	<i>p</i>
Null hypothesis	12,995.159			
General	12,991.715	3.443	2	.179

The null hypothesis states that the location parameters (slope coefficients) are the same across response categories.

^aLink function: Logit.
